Company Overview

EdTech Consulting Services LLC is a New York City-based provider of professional **Audio/Visual, Information Technology, low-voltage infrastructure, equipment, and technical support solutions**. We provide consulting, design, installation, configuration, maintenance, and technology equipment for **NYC public agencies, educational institutions, nonprofit organizations, commercial organizations, offices, and other public- and private-sector facilities**.

Our approach is focused on delivering practical, reliable, and scalable technology solutions tailored to each client's operational requirements, physical environment, and budget. From A/V systems and network infrastructure to computer and electronic equipment, EdTech provides organizations with a single resource for technology products, implementation, and ongoing support.

Organizations We Serve

NYC Agencies	**Public Schools**	**Educational Institutions**	**Nonprofits**
Government Facilities	**Commercial Offices**	**Meeting & Training Spaces**	**Multipurpose Facilities**

Core Competencies

Audio/Visual Systems Design & Integration
Consultation, design, installation, configuration, and support of professional sound, projection, display, microphone, amplification, mixing, and control systems for auditoriums, conference rooms, classrooms, cafeterias, and multipurpose spaces.

Low-Voltage Cabling & Infrastructure
Installation and organization of low-voltage cabling and supporting infrastructure for A/V, network, and technology systems, with an emphasis on clean, maintainable installations that support current and future requirements.

Computer & Electronic Equipment Sales
Supply and sourcing of computers, electronic devices, peripherals, accessories, A/V equipment, networking products, and related technology. We assist clients with identifying compatible products for their technical and operational requirements.

IT Infrastructure & Networking
Design, installation, configuration, and support of wired and wireless technology infrastructure to help organizations maintain reliable connectivity and efficient IT operations.

Integrated Technology Solutions
Integrated solutions that bring audio, video, networking, displays, controls, and supporting infrastructure together into reliable and easy-to-manage environments for public, educational, and organizational facilities.

Maintenance, Troubleshooting & Technical Support
Ongoing technical support, troubleshooting, system adjustments, preventive maintenance, and repair coordination to reduce downtime and maintain dependable day-to-day technology operations.

Certifications and vendor registrations may support supplier-diversity goals. Procurement methods, thresholds, and discretionary purchasing options vary by agency and are subject to the rules applicable to the purchasing organization.

Key Differentiators

End-to-End Technology Capabilities	Equipment sourcing, system design, installation, configuration, infrastructure, and technical support through a single provider.
Customized Solutions	Recommendations are based on the client's existing environment, operational needs, project goals, and budget.
Responsive Technical Support	Hands-on A/V, networking, and technology support focused on practical troubleshooting and minimizing downtime.
Public-Sector & Educational Experience	Experience working in active institutional environments with scheduling, budgeting, and operational considerations.

Past Performance

- Deployed professional A/V and IT systems across multiple educational facilities.
- Designed and implemented sound and video solutions for auditoriums and multipurpose environments.
- Provided IT and networking solutions supporting reliable connectivity in school and office environments.
- Supplied computer, electronic, A/V, and related technology equipment in support of client requirements.
- Provided ongoing technical support, troubleshooting, and maintenance for installed technology systems.

Our Commitment

Reliable technology. Professional installation. Responsive service. Practical solutions.

Whether the requirement involves a complete A/V system, technology infrastructure, equipment procurement, network improvements, system troubleshooting, or ongoing technical support, our objective is to provide a solution that meets the client's operational needs and delivers long-term value.
